

Plasma pretreatment system with rotary nozzle and linear table

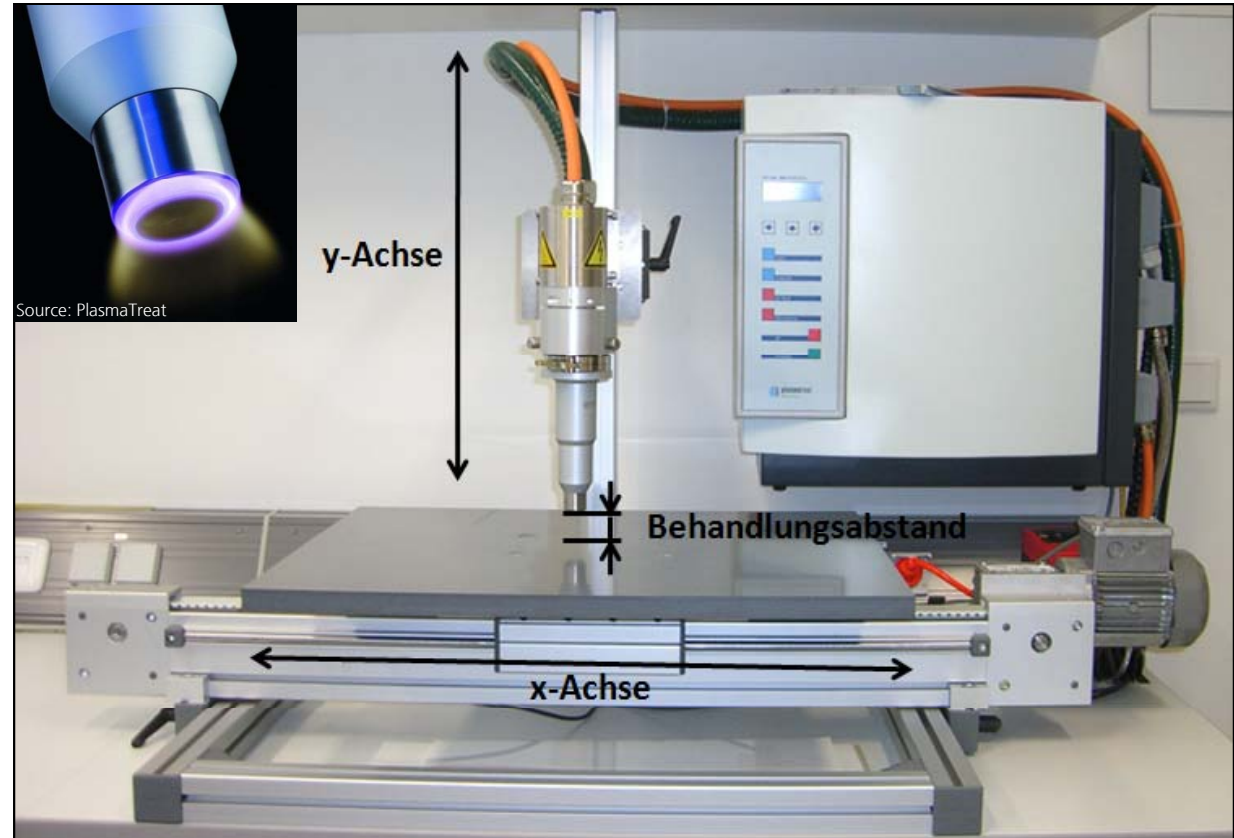

Plasmatreat FG5001 with rotary nozzle RD1004

Technical data

- Generation of cold plasma at atmospheric pressure
- Treatment width: 20 - 30 mm
- Speed: 1 - 20 m/min
- Portable for use on customers' premises

Fields of use / application

- Cleaning of components and specimens
- Activation of plastic surfaces to increase the adhesive strength of adhesive bonds
- Increase in the surface energy for better wettability

Plasma pretreatment system with linear table, plasma outlet at the rotary nozzle
